

Schuyler County Soil and Water Conservation District

Municipal Salt Storage Projects

The Schuyler County SWCD obtained over \$200,000 in funding to construct two salt storages for our municipalities. One for the Town of Dix highway department and one for the Town of Catharine. The Soil and Water District helped to perform grade and drainage at both sites to save costs. Both sites had uncontained salt storage that had direct impact on tributaries to Seneca Lake as well as ground water wells. Now the salt for both municipalities is fully under cover keeping both surface and ground water protected.
